Identity Guide

Icon Mark

Designed as a versatile standalone mark, this icon functions as a flexible graphic element and an enduring symbol of your FDE / AI Tech group identity. This mark provides a consistent, recognizable identity today

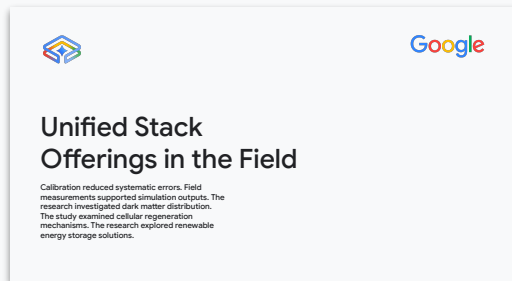

Download a high quality PNG of the logo here.

Usage

Your go-to branding element is the icon. This is the asset we use whenever you're presenting as your group.

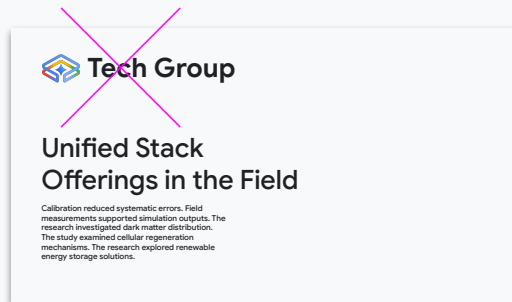

DO

Use the icon as a standalone element.
Place any additional branding separately.

DON'T

Do not lock up the icon with Google, Cloud, or any other branding.

DON'T

Do not create your own wordmark with the group name.

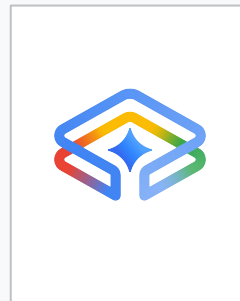

Backgrounds

If you'd like to place the icon on a gradient or photographic background, please use the single color white version.

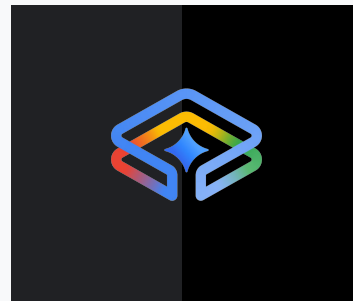

One of the four colors in the gradients will most likely disappear on color backgrounds.

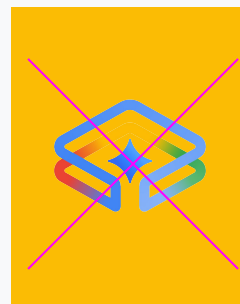

DO
Use the flat knockout logo on photography.

DO
Use the color logo on white, gray 50, black 900 or black.

DON'T
Place the color logo on photography.

DON'T
Place the color logo on highly saturated backgrounds with same color as gradient.

Beyond the Slides

Use the mark to continue to establish your group's identity. It can come to life in many ways.
